Used for Maths

All Maths topics are explained in 10 minute video tutorial. After every video there is a set of questions covering everything taught in the video so students can practise and ensure that they understand the maths that has just been presented. HegartyMaths records all progress and reports this back to the teacher and student, identifying strengths and areas of development. HegartyMaths also remembers any student mistakes and gives them practice on their areas of development so they can do impactful independent learning.

Logging on to Hegarty Maths

School: WF8 4JF

Username: First name & surname (in full) and date of birth – e.g. joebloggs01012005

Password: Type in password (either create this if using for the first time OR type in previously chosen if logged in before).

If a student has forgotten their password they can reset this by clicking on the 'forgotten password' link.
