

Years 9 & 10 – Home Learning Tasks – Key Pieces of Work – Term 5

Key pieces of work will only be set by the subjects which are within the table below and for students who study that subject. Any subjects setting ongoing coursework or not setting a key piece of work this term have been removed from the table. Key Pieces of work form the core home learning task for that subject in the week outlined below. These are not additional pieces of work to be completed.

Full details about each of the key piece of work, including how work should be submitted, the length of time to spend on it and any resources required can be found on SMHW. Once submitted the teacher will mark this piece of work and provide the student with personalised feedback.
